

## STAY TUNED

### **Radio Thailand World Service**

Radio Thailand began its external service with broadcasts in foreign languages under the call-sign HSK 9 on the 20th of October 1938.

Development in the world and the region at the time necessitated the broadcasts in English and French, to tell the foreign communities of the Thai Government's policies and stance. The content of the program at that time contained news and statements made by diplomats and foreign dignitaries.

The services has been continuously expanded and improved over the decades.

A major improvement came about in 1994, with the opening of the modern short-wave relay station in Ban Dung District, Udon Thani Province, in cooperation with the Voice of America. Its broadcast schedule has been adjusted and extended accordingly, with specific target areas to correspond with world time and languages used.

Radio Thailand World Service now transmits its signal via satellite to Udon Thani Relay Station to listeners around the world in 10 languages, which include official languages of the United Nations and languages of neighboring countries; namely English, German, Japanese, Mandarin, Burmese, Lao, Vietnamese, Khmer, Malaysian, and Thai.

Its program services comprise news, reportages, features, and analyses with the objectives to inform the audiences about events and happenings in Thailand, development in all aspects and Thai way of life.

Radio Thailand verifies your reception reports with our QSL cards, depicting sights and scenes of Thailand and Thai life. We also answer your questions by mail, e-mail and on internet. Listeners will be advised accordingly.

### ***As far as the signals reach, we are friends.***

Radio Thailand has positioned itself as a voice of Thailand. Through its World Service, Radio Thailand reaches out to foreign residents and visitors in the country, Thai communities in foreign countries or those traveling abroad, and friends of Thailand anywhere in the world.

The organization will continue to maintain and expand her operation for the present and foreseeable future for the benefit of the Thai people.

Radio Thailand, the National Broadcasting Service of Thailand is proud of her role to serve as a prime source of information for our audiences around the globe.
